

Education Challenge FAQ

Question #1:

I took one of the online classes today- what do I need to do to get credit for the class?

Answer:

At the end of the class you will be downloading a file of all the information covered during the class. Print page #1 and attach it to one of the Tracking Sheets for the Education Challenge. These Tracking Sheets are available on our website. Please be certain to fill in the class name and date of class. After verifying that your Access Codes came from a source that is approved for the Education Challenge, we will add the points to your total.

Question #2:

I purchased the Elegante workbook. Do I just start working through it?

Answer:

You will need to look up the Ellegante Workbook Section in the Education Challenge. It will tell you what pages to read and what stitches, etc to complete as your documentation. Be sure to label your stitch-outs and write them down on your Tracking Sheet.

Questions #3:

Does the video lessons on MasterWorks1 count?

Answer:

MasterWorks1 Software will not match up with the MasterWorks2 DVD Tutorial exactly, so we are only granting Education Challenge Points from MW2 users. It has been possible to upgrade MW1 Software for over 3 years now and we encourage you to keep your software current.

Question #4

I attended the Puncher machine workshop along with 2 guests I brought along with me. I plan to attend the Embroidery Craze and Sassy Software classes at the OKC store. Do these count?

Answer Part One:

To get credit for a Special Event, such as the Christopher Neiman Event, you must list the date(s) and Event name on an Education Challenge Tracking Sheet. Send the Tracking Sheet in to the School Division before the contest deadline. Once we verify your attendance, we fill in the point totals. Please note, awarding points for these events is a complex process that includes evaluating the actual class to decide how much of the class was entertainment and how much was technique. Please note that we also will not award any points for attendance if you did not register thru the Education Division. (On-line website registration and In-Store registrations will not accumulate Education Challenge Points.)

Answer Part Two:

To get credit for attending a Guide Class or Club at one of our B-Sew Inn Stores, you need to list the exact date and store location on one of the Tracking Sheets. Send the Tracking Sheet in to the School Division before the contest deadline. When the Tracking

Sheet arrives here we will pull the computer information from the store to compare the attendance lists. As long as we can confirm that the computer shows you as being there on that date, we will award the appropriate Challenge Points to you.

Question #5

I am interested in the DG Learning Guides. It seems like a fast method to add up Challenge Points. What are the topics of these Learning Guides and where do I get them? Do I need to have the corresponding software to use the Learning Guides for points?

Answer:

To qualify for Challenge Points, Learning Guides can be purchased thru the Education Division only. This allows us tracking ability. You do NOT need to buy the software to qualify for points using these Learning Guides. We feel that even though the Guides are designed for specific software, the information will be helpful in figuring out other software or computer functions. For now, we are not requiring anything other than getting the Learning Guide and reading them from beginning to end.

The topics are as follows:

- 1) A to Z with LetterWorks*
- 2) Basic Computer Skills for Embroiders*
- 3) Basics of CustomWorks*
- 4) Get Acquainted with MasterWorks Lite*
- 5) Interactive Embroidery – Christmas Traditions*
- 6) QuiltMotion Basics*
- 7) DensityWorks Difference*
- 8) Exploring MasterWorks2*
- 9) Getting Started with Studio3*
- 10) Floral Accents Interactive*
- 11) Playtime Applique Interactive*
