

Program A Baby Lock Acclaim

Designed for classrooms seeking student exposure to Garment Construction, Home Interior and Fashion Design Technology at a professional, career level.

Program B Baby Lock Flourish II

Ideal for classrooms seeking the ability to include embroidery technology with Garment Construction/Fashion/Interior Design/Textiles.

B-Sew Inn offers 4 unique Technology Loaner Programs.

B-Sew Inn offers FOUR unique Technology Loaner Programs, and a choice of free On-Site Group Training or Individual On-Line Training Resources.

Program C ScanNCut DX

Perfect for classrooms that value hands-on discovery in graphic design and digital arts. Digital Cutters also be used for entrepreneurship ventures, community service projects, and after-school programs.

Program D Baby Lock Alliance

Created for classrooms that want to explore the entrepreneurship potential of a School Based Logo Shop.

THE B-SEW INN DIFFERENCE

Our programs allow you to test a particular type of technology and evaluate its effectiveness for your unique classroom and students. Prior to equipment arrival, educators will be provided with free hands-on or on-line training. Loaner Programs are 6-9 months in length and provide ample opportunities for students to truly experience the technology. Schools that decide to purchase their selection are given substantial discounts on machines and future supplies. For schools that decide to return their machines, the process is simple. This is not a lease or rental program. It is an free trial, training and evaluation program.

Our Thoughtfully Designed Programs

-  Help teachers succeed in providing the most financially responsible machine option for the needs of their classroom
-  Help students succeed by using up-to-date machines with safety features that will minimize classroom accidents and build student confidence
-  Help administrators evaluate specific equipment before they make a financial investment
-  Work one-on-one with B-Sew Inn's Education Division Expert, experienced in grant proposals, tax exempt status, and other unique considerations applicable to your school needs

B-Sew Inn Education Division

Working with Baby Lock to Expand your Opportunities & Spread the Love of Sewing

TECHNOLOGY LOANER PROGRAM

B-Sew Inn has been working with classrooms across the nation for over 20 years to provide them with innovative technology in sewing, embroidery, digitizing, and quilting. Join the innovation revolution with our exclusive technology loaner program.

TECHNOLOGY FOR EVERY CLASSROOM

More and more classrooms are offering instruction in monogramming, entrepreneurship training utilizing embroidery equipment, machine quilting, graphic design and embroidery digitizing lessons. PLUS, classrooms offering both basic and advanced sewing instruction for fashion design, home interior and garment construction are increasing each year.

Technology Benefits Your Classroom

 Advanced machines develop math, science, business and computer technology skills students need to succeed

 Your students will be more engaged in learning through machines that enhance their creativity

 Advanced machines allow students to connect from the initial project vision and design, through the creation and assembly, and to a finished project

 Students will gain confidence as they are able to complete their projects without machine frustrations and set-backs

 With modern machines and new safety features, you'll love how easy, safe and fun teaching can be!

 Regardless of size, district, or current classroom equipment, we will work with you to design a classroom that meets the needs of your curriculum and inspires your students.

How Our Loaner Program Works

 You get to evaluate specific equipment functions to determine classroom value prior to any investment of funds

 There is NO obligation to purchase

 If you find it to be an asset for classroom instruction, you are given the opportunity to purchase the equipment at a reduced price

 If you have not updated your classroom for the changes for the Fashion, Design, and Textile Industries, this is your opportunity to make your first step!

Getting Started is Easy!

- 1** Select the appropriate Program Option for your classroom from this brochure
- 2** Determine if you would like to host an on-site group training at your location OR utilize one of our on-line training resources.
- 3** Discuss and finalize the details of your selection with our education team. Complete your Program Agreement Form.
